Volume 145 1984

Table of Contents

No. 1 1–202 issued on November 15, 1984
No. 2 203–436 issued on December 3, 1984
No. 3 437–684 issued on December 17, 1984

Antigenic structures of proteins. Their determination has revealed important aspects of immune recognition and generated strategies for synthetic mimicking of protein binding sites
M. Z. Atassi 1– 20

Mobile genetic elements in animal cells and their biological significance
G. P. Georgiev 203–220

Corrections 683

Nucleic acids, protein synthesis, and molecular genetics

Effects of cell sap, ATP, and RNA synthesis on the transfer of ribosomal proteins into nuclei and nucleoli in a rat liver cell-free system
K. Tsurugi and K. Ogata 83– 89

Regulation of protein synthesis in eukaryotes. Mode of action of eRF, an eIF-2-recycling factor from rabbit reticulocytes involved in GDP/GTP exchange
M. Salimans, H. Goumans, H. Amesz, R. Benne, and H. O. Voorma 91– 98

Effect of 5-azacytidine on DNA methylation and on the enzymes of *de novo* pyrimidine biosynthesis in *Bacillus subtilis* Marburg strain
S. Guha 99–106

Role of the stringent response in the expression and mechanism of near-ultraviolet induced growth delay
K. Thiam and A. Favre 137–142

Translational repression of mRNA for eucaryotic elongation factors in Friend erythroleukemia cells
L. I. Slobin and P. Jordan 143–150

Nucleotide sequence of cloned cDNAs coding for preprosecapin, a major product of queen-bee venom glands
R. Vlasak and G. Kreil 279–282

Synthesis of wheat leaf nitrite reductase *de novo* following induction with nitrate and light
I. S. Small and J. C. Gray 291–297

Characterization of the transcription products of glyceraldehyde 3-phosphate-dehydrogenase gene in HeLa cells
C. Dani, M. Piechaczyk, Y. Audigier, S. El Sabouty, G. Cathala, L. Marty, P. Fort, J.-M. Blanchard, and P. Jeanteur 299–304

pH-induced co-operative effects in hysteretic enzymes. 2. pH-induced co-operative effects in a cell-wall β-glucosyltransferase
J. Nari, G. Noat, and J. Ricard 319–322

Increased ribosomal affinity for mRNA causes resistance to edeine in a mutant of *Saccharomyces cerevisiae*
F. Herrera, N. Moreno, and J. A. Martínez 339–344

Quantification of the different ribosomal phases during the translational elongation cycle in rabbit reticulocyte lysates
O. Nygård and L. Nilsson 345–350

Developmental regulation of gene expression in wheat embryos. Molecular cloning of a DNA sequence encoding the early-methionine-labelled (E_m) polypeptide
A. C. Cuming 351–357

Yeast $tRNA^{Asp}$: codon and wobble codon-anticodon interactions. A transferred nuclear Overhauser enhancement study
A. M. Gronenborn, G. M. Clore, L. W. McLaughlin, E. Graeser, B. Lorber, and R. Giegé 359–364

The nature of the interaction of eukaryotic initiation factor 2 with double-stranded RNA
D. Itamar, R. Gonsky, M. Lebendiker, and R. Kaempfer 373–379

RNA and ribosomal protein patterns during aerial spore germination in *Streptomyces granaticolor*
K. Mikulík, I. Janda, J. Weiser, J. Šťastná, and A. Jiráňová 381–388

Effects of glucagon, dexamethasone and triiodothyronine on phospho*enol*pyruvate carboxykinase (GTP) synthesis and mRNA level in rat liver cells
P. B. Iynedjian and A. Salavert 489–497

Synthesis *in vitro* of precursors of the catalytic subunits of acetylcholinesterase from *Torpedo marmorata* and *Electrophorus electricus*
J.-L. Sikorav, J. Grassi, and S. Bon 519–524

Isolation and the 5'-end nucleotide sequence of *Bacillus licheniformis* α-amylase gene
M. Sibakov and I. Palva 567–572

Kinetic evidence for redistribution of actinomycin molecules between potential DNA-binding sites
K. R. Fox and M. J. Waring 579–586

A two-dimensional NMR study of the solution structure of a DNA dodecamer comprising the consensus sequence for the specific DNA-binding sites of the glucocorticoid receptor protein
G. M. Clore, H. Lauble, T. A. Frenkiel, and A. M. Gronenborn 629–636

Biosynthesis of intestinal microvillar proteins. Expression of aminopeptidase N along the crypt-villus axis
E. M. Danielsen 653–658

Protein chemistry and structure

Thrombospondin interactions with fibronectin and fibrinogen. Mutual inhibition in binding
J. Lahav, J. Lawler, and M. A. Gimbrone 151–156

Chemical synthesis of an octadecapeptide with the biological and immunological properties of human heat-stable *Escherichia coli* enterotoxin
R. A. Houghten, J. M. Ostresh, and F. A. Klipstein 157–162

Effect of nucleotides, divalent cations and temperature on the tryptic susceptibility of myosin subfragment 1
G. Mocz, L. Szilagyi, R. Chen Lu, F. Fabian, M. Balint, and J. Gergely 221–229

Oligo(methionyl) proteins. Enzymatic hydrolysis of the model isopeptides N^{ε}-oligo (L-methionyl)-L-lysine
H. Gaertner and A. Puigserver 257–263

L-Lactate dehydrogenase from *Thermus caldophilus* GK24, an extremely thermophilic bacterium. Desensitization to fructose 1,6-bisphosphate in the activated state by arginine-specific chemical modification and the N-terminal amino acid sequence
H. Taguchi, H. Matsuzawa and T. Ohta 283–290

Identification using ^{1}H NMR spectroscopy of slowly exchanging amide hydrogens of hen lysozyme in solution
M. Delepierre, C. M. Dobson, M. A. Howarth, and F. M. Poulsen 389–395

Protease inhibitors from the parasitic worm *Parascaris equorum*
A. Concetti, E. Fioretti, D. Barra, and F. Ascoli 417–421

Two-dimensional ^{1}H NMR of two chemically modified analogs of the basic pancreatic trypsin inhibitor. Sequence-specific resonance assignments and sequence location of conformation changes relative to the native protein
C. I. Stassinopoulou, G. Wagner, and K. Wüthrich 423–430

Amide-proton exchange studies by two-dimensional correlated ^{1}H NMR in two chemically modified analogs of the basic pancreatic trypsin inhibitor
G. Wagner, C. I. Stassinopoulou, and K. Wüthrich 431–436

Human liver alcohol dehydrogenase. 1. The primary structure of the $\beta_1\beta_1$ isoenzyme
J. Hempel, R. Bühler, R. Kaiser, B. Holmquist, C. de Zalenski, J.-P. von Wartburg, B. Vallee, and H. Jörnvall 437–445

Human liver alcohol dehydrogenase. 2. The primary structure of the γ_1 protein chain
R. Bühler, J. Hempel, R. Kaiser, C. de Zalenski, J.-P. von Wartburg, and H. Jörnvall 447–453

Primary structure of α-clostripain light chain
A.-M. Gilles, A. Lecroisey, and B. Keil 469–476

The amino-acid sequence of copper/zinc superoxide dismutase from swordfish liver. Comparison of copper/zinc superoxide dismutase sequences
H. A. Rocha, W. H. Bannister, and J. V. Bannister 477–484

A novel form of gastric inhibitory polypeptide (GIP) isolated from bovine intestine using a radioreceptor assay. Fragmentation with staphylococcal protease results in GIP_{1-3} and GIP_{4-42}, fragmentation with enterokinase in GIP_{1-16} and GIP_{17-42}
M. Carlquist, M. Maletti, H. Jörnvall, and V. Mutt 573–577

An improved synthesis of crystalline mammalian glucagon
S. Mojsov and R. B. Merrifield 601–605

Human lactotransferrin: amino acid sequence and structural comparisons with other transferrins
M.-H. Metz-Boutigue, J. Jollès, J. Mazurier, F. Schoentgen, D. Legrand, G. Spik, J. Montreuil, and P. Jollès 659–676

Enzymology

Some aspects of the phosphorylation of phenylalanine 4-monooxygenase by a calcium-dependent and calmodulin-dependent protein kinase
A. P. Døskeland, C. M. Schworer, S. O. Døskeland, T. D. Chrisman, T. R. Soderling, J. D. Corbin, and T. Flatmark 31–37

The protein phosphatases involved in cellular regulation. Glycolysis, gluconeogenesis and aromatic amino acid breakdown in rat liver
S. Pelech, P. Cohen, M. J. Fisher, C. I. Pogson, M. R. El-Maghrabi, and S. J. Pilkis 39–49

The protein phosphatases involved in cellular regulation. Antibody to protein phosphatase-2A as a probe of phosphatase structure and function
S. Alemany, H. Y. L. Tung, S. Shenolikar, S. J. Pilkis, and P. Cohen 51–56

The protein phosphatases involved in cellular regulation. Comparison of native and reconstituted Mg-ATP-dependent protein phosphatases from rabbit skeletal muscle
H. Y. L. Tung and P. Cohen 57–64

The protein phosphatases involved in cellular regulation. Identification of the inhibitor-2 phosphatases in rabbit skeletal muscle
N. K. Tonks and P. Cohen 65–70

Suppression of kinetic cooperativity of hexokinase D (glucokinase) by competitive inhibitors. A slow transition model
M. L. Cárdenas, E. Rabajille, and H. Niemeyer 163–171

Chemical modification of sulfhydryl groups in *p*-hydroxybenzoate hydroxylase from *Pseudomonas fluorescencs*. Involvement in catalysis and assignment in the sequence
W. J. H. van Berkel, W. J. Weijer, F. Müller, P. A. Jekel, and J. J. Beintema 245–256

pH-induced co-operative effects in hysteretic enzymes. 1. A theoretical model of a new type of co-operative behaviour controlled by pH
J. Ricard, G. Noat, and J. Nari 311–317

Glucose-6-phosphate dehydrogenase. A transferred nuclear Overhauser enhancement study of $NADP^+$ conformations in enzyme-coenzyme binary complexes
A. M. Gronenborn, G. M. Clore, L. Hobbs, and J. Jeffery 365–371

The 'slow' pH-induced conformational transition of chloroplast fructose 1,6-bisphosphatase and the control of the Calvin cycle
B. Gontero, J.-C. Meunier, J. Buc, and J. Ricard 485–488

Regulation of bovine kidney branched-chain 2-oxoacid dehydrogenase complex by reversible phosphorylation
K. G. Cook, A. P. Bradford, S. J. Yeaman, A. Aitken, I. M. Fearnley, and J. E. Walker 587–591

Subunit structure and autophosphorylation mechanism of casein kinase-TS (type-2) from rat liver cytosol
F. Meggio and L. A. Pinna 593–599

Protein phosphorylation in the Archaebacterium *Sulfolobus acidocaldarius*
R. Skórko 617–622

Purification and properties of the soluble hydrogenase from *Desulfovibrio desulfuricans* (strain Norway 4)
R. Rieder, R. Cammack, and D. O. Hall 637–643

Spectroscopic studies of the nature of the iron clusters in the soluble hydrogenase from *Desulfovibrio desulfuricans* (strain Norway 4)
S. H. Bell, D. P. E. Dickson, R. Rieder, R. Cammack, D. S. Patil, D. O. Hall, and K. K. Rao 645–651

Carbohydrates, lipids and other natural products

Structure of the lipopolysaccharide core isolated from a human strain of *Aeromonas hydrophila*
F. Michon, D. H. Shaw, and J. H. Banoub 107–114

The structure of a novel polysaccharide isolated from *Zymomonas mobilis* determined by nuclear magnetic resonance spectroscopy
K. D. Barrow, J. G. Collins, P. L. Rogers, and G. M. Smith 173–179

α-2→4-Interlinked 3-deoxy-D-*manno*-octulosonic acid disaccharide. A common constituent of enterobacterial lipopolysaccharides
H. Brade and E.-T. Rietschel 231–236

Nature and location of amide-bound (*R*)-3-acyloxyacyl groups in lipid A of lipopolysaccharides from various gram-negative bacteria
H.-W. Wollenweber, U. Seydel, B. Lindner, O. Lüderitz, and E.-T. Rietschel 265–272

Structural studies on the *O*-glycosidically linked carbohydrate chains of glucoamylase G1 from *Aspergillus niger*
A. Gunnarsson, B. Svensson, B. Nilsson, and S. Svensson 463–467

Structural studies on the lipid A component of enterobacterial lipopolysaccharides by laser desorption mass spectrometry. Location of acyl groups at the lipid A backbone
U. Seydel, B. Lindner, H.-W. Wollenweber, and E. T. Rietschel 505–509

Purification and structures of branched blood-group-B-active glycosphingolipids from human erythrocyte membranes
P. Hanfland, M. Kordowicz, H. Niermann, H. Egge, U. Dabrowski, J. Peter-Katalinic, and J. Dabrowski 531–542

Flavobacterium heparinum 2-*O*-sulphatase for 2-*O*-sulphato-$\Delta_{4,5}$-glycuronate-terminated oligosaccharides from heparin
M. W. McLean, J. S. Bruce, W. F. Long, and F. B. Williamson 607–615

Physical biochemistry

Interaction of β-endorphin with sodium dodecyl sulfate in aqueous solution ^{1}H-NMR investigation
L. Zetta and R. Kaptein 181–186

^{31}P nuclear magnetic resonance and chemical studies of the phosphorus residues in bovine milk xanthine oxidase
M. D. Davis, D. E. Edmondson, and F. Müller 237–243

Conformational stability of the myosin rod
R. A. Cross, R. G. Bardsley, D. A. Ledward, J. V. Small, and A. Sobieszek 305–310

Studies on the oxidation of hemoglobin Zurich ($beta_{63}$ E7 Arg)
E. E. di Iorio, K. H. Winterhalter, A. Mansouri, W. E. Blumberg, and J. Peisach 549–554

Linear free-energy relationships in binding of oxygen and carbon monoxide with heme model compounds and heme proteins
D. Lavalette, C. Tetreau, J. Mispelter, M. Momenteau, and J.-M. Lhoste 555–565

Membranes and bioenergetics

Characterization of ATP-dependent Ca^+ uptake by canine brain microsomes with saponin
T. Inamitsu and I. Ohtsuki 115–121

Photoaffinity labelling of dopamine receptors. Synthesis and binding characteristics of azapride
W. Wouters, J. van Dun, and P. M. Laduron 273–278

β-D-Galactoside transport in *Escherichia coli*. Solubilization in organic solvent and reconstitution of binding
B. König and H. Sandermann Jr 397–402

Phosphorylation *in vivo* and *in vitro* of the arginine-ornithine periplasmic transport protein of *Escherichia coli*
R. T. F. Celis 403–411

The interaction of mitochondrial transhydrogenase with derivatives of coenzyme A
I. A. Kozlov, Y. M. Milgrom, L. A. Saburova, and A. Y. Sobolev 413–416

Extensive cross-linking of calf brain plain synaptic vesicle proteins
E. Antonian and E. R. Thornton 511–517

Neuropeptide Y receptor in the rat brain
A. Undén, K. Tatemoto, V. Mutt, and T. Bartfai 525–530

Cellular biochemistry and metabolism

Long-chain acyl-coenzyme A synthetase from rat brain microsomes. Kinetic studies using [1-^{14}C]docosahexaenoic acid substrate
T. S. Reddy, H. Sprecher, and N. G. Bazan 21– 29

Effect of maleimide derivatives on superoxide-generating system of guinea-pig neutrophils stimulated by different stimuli
T. Yamashita, A. Someya, and Y. Tsuzawa-Kido 71–76

Exposure of the major human red-cell glycolipid, globoside, to galactose oxidase
A. Lampio, J. Finne, D. Homer, and C. G. Gahmberg 77–82

Synthesis of collagenase and collagenase inhibitors by osteoblast-like cells in culture
K. Otsuka, J. Sodek, and H. Limeback 123–129

Significance of glutathione S-conjugate for glutathione metabolism in human erythrocytes
T. Kondo, N. Taniguchi, and Y. Kawakami 131–136

The mechanism by which glucose increases fructose 2,6-bisphosphate concentration in *Saccharomyces cerevisiae*. A cyclic-AMP-dependent activation of phosphofructokinase 2
J. François, E. van Schaftingen, and H.-G. Hers 187–193

Induction of chalcone isomerase in elicitor-treated bean cells. Comparison of rates of synthesis and appearance of immunodetectable enzyme
M. P. Robbins and R. A. Dixon 195–202

The action of anoxia and cyanide on glycogen breakdown in the liver of the *gsd/gsd* rat
J. V. Conaglen, R. S. Malthus, J. C. Redshaw-Loten, and J. G. T. Sneyd 323–327

Production of steroid hormone and cyclic AMP in hybrids of adrenal and Leydig cells generated by electrofusion
E. J. Podestá, A. R. Solano, L. Molina y Vedia, A. Paladini Jr, M. L. Sánchez, and H. N. Torres 329–332

N_i-mediated inhibition of human platelet adenylate cyclase by thrombin
K. Aktories and K. H. Jakobs 333–338

Expression of cytochromes P-450 in rat hepatoma cells. Analysis by monoclonal antibodies specific for cytochromes P-450 from rat liver induced by 3-methylcholanthrene or phenobarbital
F. J. Wiebel, S.-S. Park, F. Kiefer, and H. V. Gelboin 455–462

Alteration with dietary state of the activity and zonal distribution of adenylate cyclase stimulated by glucagon, fluoride and forskolin in microdissected rat liver tissue
S. Zierz and K. Jungermann 499–504

Studies on glucose-induced inactivation of gluconeogenetic enzymes in adenylate cyclase and cAMP-dependent protein kinase yeast mutants
P. Tortora, N. Burlini, G. Caspani, and A. Guerritore 543–548

Effect of amino acid metabolites on lysosomal protein degradation. A regulatory role for kynurenine?
B. Grinde 623–627

Developmental biochemistry and immunology

Immunostimulating hexapeptide from human casein: amino acid sequence, synthesis and biological properties
F. Parker, D. Migliore-Samour, F. Floc'h, A. Zerial, G. H. Werner, J. Jollès, M. Casaretto, H. Zahn, and P. Jollès 677–682

Indexed in Current Contents
